

★ OVERALL ANALYSIS

◆ Overview

This report provides insights into total sales, revenue distribution, product performance, and regional trends.

◆ Key Metrics

Total Sales: 1,06,67,881

Highest Revenue Category:

Electronics (53,26,074)

Highest Revenue Region: Western Region (28,44,450)

Lowest Sales Category: Office (10,94,216)

◆ Category Insights

Electronics category generates the highest sales and profit. It also records the maximum quantity sold, indicating strong demand.

Office category has the lowest sales and profit, likely due to fewer orders.

◆ Regional Insights

Western Region contributes the highest revenue and profit.

North Region shows the lowest sales and profit performance.

◆ Product-Level Insights

Mouse and Monitor have the highest average quantity ordered.

Products like Smartphone, Smartwatch, Tablet, Laptop, and Camera show similar average order quantities.

and North Region require strategic improvements to boost sales and performance.

◆ Profitability Analysis

Electronics category has the highest profit margin.

Lower order volume in Office category results in reduced profitability.

◆ Conclusion

The analysis highlights that Electronics category and Western Region are the primary drivers of revenue and profit. In contrast, the Office category and North Region require strategic improvements to boost sales and performance.

RECOMMENDATIONS

- ❖ The business should focus on improving the Office Category because this category is earning least profits because of fewer orders
- ❖ The business should focus on increasing and spreading the sale Region wise because as of current report Western Region is the one contributing highly.
- ❖ The business should also focus on products other than Mouse and Monitor because amongst all variety of products only these two products have highest average quantity ordered.
- ❖ In order to maintain proper sales in western region there should be proper schemes and loyalty programs.
